GOOD TO REMEMBER

HOUSEHOLD HINTS THAT WILL BE FOUND OF VALUE.

Easy and Effective Method of Polishing Floors—Removing Smoke Marks From Ceilings—To Marble Freshness.

When Polishing Floors.—Make a thick pad of felt or velvet and fasten it over an old worn-out and hairless broom. This makes an excellent polisher and saves the trouble of kneeling on the floor.

To Remove Smoke Marks From Ceilings.—Mix a thick paste of starch and water, and with a clean flannel spread it over the mark. Allow to get thoroughly dry, then brush off with a soft brush and the marks will have disappeared.

When Cleaning Mirrors and Windows.—Sprinkle a few drops of metal polish upon a cloth and rub over the glass. Leave to dry, then polish with a clean cloth. This is the quickest and easiest way to clean them.

Before Sweeping the Carpets.—Take an old round tin, pierce holes in the bottom, and fill with common salt. Sprinkle this over the carpet. It prevents the dust from rising, brightens the colors, and prevents moths.

To Clean Marble.—Rub with a slice of lemon dipped in salt. Leave for an hour, then wash off. All stains will be removed and a nice gloss secured.

To Clean Varnish and Paint.—Rub with a cloth dipped in a weak solution of vinegar and warm water. Polish with a wash leather.

To Clean Gilt Picture Frames.—Put a gill of vinegar into a pint of soft cold water. Remove all dust from the frames, dip a large camel's hair brush in the mixture, squeeze it partly dry, then brush the gilt, doing a small portion at a time.

IMPORTANT PART OF LUNCH

Sandwiches, Properly Protected, May Be Kept Appetizing for Almost Indefinite Period.

If sandwiches are not to be used for some time after they are made they can be wrapped in waxed paper and put in a tin bread or cake box. Some persons wrap them in a slightly damp cloth and keep them in the ice box. When sandwiches are carried for a picnic lunch they sometimes taste of the box they are carried in, and if they are wrapped in waxed paper they carry better in a wicker basket through which the air circulates.

Fruit sandwiches are more generally used than they used to be, and are so delicious that they ought to form a part of every sandwich repast. They satisfy a natural craving for sweets, and are more wholesome and more easily made than cakes or candies.

English Biscuits.

Sift together one and one-half pints of flour, one cupful of cornstarch, three tablespoonfuls of sugar, two teaspoonfuls of baking powder and one-half teaspoonful of salt. Rub in three tablespoonfuls of butter, add one well-beaten egg, one cupful of milk, one-half cupful of currants and one tablespoonful of coriander seed. Mix into a smooth, soft dough, roll one-half inch thick, cut in rounds, and bake on buttered tins in a hot oven for twenty minutes. When done, rub over a little butter on a clean bit of cloth.

To Make Handkerchiefs.

Elaborate as well as simple handkerchiefs may be made from scraps of lawn, lace and beading. Roll the edges instead of hemming, which is done by slightly moistening the thumb and finger and rolling as tight as possible. Be careful not to stretch the goods. The more sheer the material the easier it is to do this rolling. It is not necessary to have each row of insertion or lace of the same kind. The effect is prettier where different kinds are used.

Celery Croquettes.

One cup mashed potato, three-fourths cup finely sliced celery, one to one and a half teaspoonfuls butter, two tablespoonfuls chopped nuts, not too fine, a little salt. Do not cook celery, mix all ingredients while potato is hot, cool, shape, egg and crumb, stand in a cold place until ready to bake. Bake in a quick oven 10 minutes or until croquettes begin to crack and are a delicate brown.

Boiled Rice.

After washing the rice put it over the fire in plenty of actually boiling salted water and let it boil fast for 12 minutes; then drain off all the water, place the saucepan containing the rice in the oven with the door open and let it steam for 10 minutes, or until it is as tender as desired. Every grain will be distinct and the rice free from moisture.

Only a Feather.

Paris is wearing both the curled and uncurled ostrich feathers, says the New York Press. An ostrich feather is often a sole trimming of a hat, and frequently a cluster of small flowers is sewed at the base of the feather.

NO OCCASION FOR BIG HURRY

Scientific Announcement Changes Mind of Prospective Coal Buyer—Willing to Chance It.

"Hello! Is that the office of the Ash-Pitt Coal company?"

"Yes."

"This is Snoodle, 927 Ringbone avenue, and—"

"Yes; what can we do for you, Mr. Snoodle?"

"Nothing this morning. Say, I've just received your circular containing the announcement that you're going to tack the usual increase of 10 cents a month on the price per ton, and that I'd better buy my next winter supply now, while it's at the bottom figure."

"Yes."

"Well, I see by an item in a scientific paper I take that there's enough coal in the United States, making due allowance for the increase in population and coal consumption per capita, to last the country 5,000 years, and I've decided that I don't need to be in such a thundering hurry to get my next winter's coal in. I'll chance it. Good-by."

Explaining the Needle.

A typesetter in a printing house became very adroit in explaining the large number of misprints for which he was responsible. Even when he changed his work and became a waiter in a restaurant his skill did not for sake him.

One day he had served a guest with a plate of soup and was turning away, when he was called back sharply.

"This is an outrage!" cried the indignant diner. "I find a needle in my soup! What does this mean?"

"Just a misprint, sir," explained the former typesetter. "It should have been a noodle."—Youth's Companion

VERY ODD.

Policeman—Why did that man strike you in the face?

Smith—He said he was an "Odd Fellow," and I told him he looked the part.

Tragedies Told in Headlines.
"Boss Sees His 'Sick' Bookkeeper at Ball Game."

"Punctured Tire Causes Elopement Couple to Miss Train."

"Mr. Tyte-Phist Predicts Untold Misery as Result of Income Tax Law."

"Big Brother of Divorced Wife Injures Flist, but Collects Stipulated Alimony."

"Horse Prostrate on Muddy Crossing Rises Unexpectedly and Shakes Himself; Three Shoppers' Dresses Ruined."

"Robinson and Smith Families Moved to Get Rid of Each Other; Find They Are in Adjoining Flats."

Wanted No Amateurs.

Edith and Flora were spending their summer vacations in the country.

"Do you know," said Edith, "that young farmer tried to kiss me. He told me that he had never kissed any girl before."

"What did you tell him?" asked Flora.

"Why," replied Edith, "I told him I was no agricultural experiment station."—Harper's Bazar.

Anecdote of Zeuxis.

Zeuxis, the celebrated artist of ancient Greece, had painted the cherries so true to life that the birds came and pecked at them.

Of course, the rich pork packer who had paid \$500,000 for the canvas couldn't stand for that.

"Paint in a scarecrow!" he commanded, with an air of one accustomed to meet emergencies.—Puck.

Volunteers to the Front.

"Women are not heroic after all."

"How now, Diavolo, how now?"

"You frequently hear of a man refusing to have his hair cut until a certain party comes into power."

"Well?"

"Has any suffragette vowed not to powder her nose until the cause is victorious?"

Let the Others Do It.

"Master this secret early in life, son," said old Mr. Polonius.

"What is it, dad?"

"You needn't chase your hat when it blows off. If you puff up and look pompous other people will chase it for you. And this applies to a great many other things as well."

In Training.

"I did not know you were in athletic training?"

"Just lately. You see there is to be a Sunday school picnic next week and I'll have to go along to carry the baskets and to pull the kids out of the river."

San Pedro Martir Mountain

One of the Camps

THE Coast Range culminates in the peaks of San Geronimo and San Bernardino of the San Bernardino mountains, with San Antonio and San Jacinto only a little lower on either side. Then the range makes a decided drop to the south and shows heights of quite a different character, with blunt tops instead of sharp peaks. Palomar and Cajon mountains are bold and conspicuous but not high, as mountains on the coast go. Still farther south, however, in the peninsula of Lower California, the range makes another lunge upward and produces the great San Pedro Martir mountain, more than nine thousand feet high. That is its last great effort, for in its more southern reaches it is much more broken, with plenty of peaks, to be sure, but no high ones.

While some of the mountains of the upper part of the range are higher than San Pedro Martir, none other presents so huge a bulk. Seen from San Telmo, it is an unbroken wall forty or fifty miles long, which at the north end is first cut down sharply and then beyond is almost completely demolished, as mountains rank; and at the south end is torn into gaps and has had its crest knocked off.

There are two picachos, sharp, needlelike, of pure white granite, but they are so near the eastern side of the mountain that they cannot be seen at all from the west, and not from the south till one has reached San Juan De Dios, then they appear pointing heavenward, shining white like great icebergs.

Almost Perpendicular.

The western side of the mountain is abrupt, with very few places where it may be climbed, but the eastern side is still more so and makes an almost perpendicular drop to the desert. On that side one may descend, in scarcely more than an hour's time, from snow and freezing temperature to a spot where the sun is warm and birds are nesting. And then from beneath the feathery crowns of tropical palms he may look back to where, almost directly overhead, stand the rugged pines he has just left.

It is miles across the top from east to west, and with its great length the dimensions of the mountain are such as to almost entitle it to be called a high tableland, with hills and valleys and streams of its own. As it is high enough to catch winter snows and summer rains, the pasturage on the top is always good, and when the lower lands between the mountain and the Pacific are parched with drought here is a haven for starving herds. They come from as far away as San Juan De Dios and grow fat on the sweet grasses and the delightfully cool summer air. When winter grips the mountain, however, the herds must descend, for then the climate is too rigorous to be borne without sufficient shelter.

The cattle and horses are not the only ones that grow fat from a summer residence on San Pedro; the herds also are in clover, for the great forests are the home of innumerable deer, and bighorn as well, though not in so great numbers as the deer. Two Mexican friends of mine who were tending a herd of cattle on the summit, in two weeks shot fifty deer and might easily have shot more, but they could not take care of and transport any more jerked meat.

Another man had a standing offer from a San Francisco firm of \$25 for every head of a male bighorn, and he shipped a good many. That traffic of course was stopped when Mexican law declared a closed season for mountain sheep. It was high time, too, for they were wantonly destroyed, sometimes not even for their heads and skins, but merely for the pleasure of slaughter. I think if American hunters had understood how easily those marvelous hunting grounds might be reached by boat to San Quintin, where an efficient Mexican guide with excellent saddle and pack mules was to be procured, the slaughter would have been cured, the slaughter would have proceeded more merrily still. I heard of one American, and he from distant Boston, who had discovered this hunter's El Dorado, and who made periodical trips to it. That was before Mexico, in fear of insurgents, forbade the importation of firearms into the peninsula.

It is not strange that San Pedro should harbor so much game, for it is the only really wooded mountain on the peninsula, and the timber here is very fine. Deer and bighorn are not the only game; other animals there are, not so harmless, and that may even play the roll of hunter instead of hunted. Mountain lions are so numerous that young colts, which they consider the most delicious of tidbits, have a hard time trying to become horses. A man living on the western slope of the mountain showed me a corral fully five feet high from which a mountain lion took a three-year-old filly, leaping the fence with ease with the colt in his mouth, and dragging the carcass a mile up the side of the mountain before he stopped for his meal.

Raging Torrents.

On the eastern side there are streams that start bravely from the mountain, but they are immediately sucked up by the sands of the desert. Canyon Diablo is an excellent example of this; in the time of rains the water rushes from the mouth of the extremely narrow, rocky canyon, which is a mere slit, in the mountain wall, in a tumultuous flood. It entirely fills the narrow opening so that the canyon cannot be ascended beyond its mouth, and it cannot be crossed, such a raging torrent is it. Yet in less than a mile it has disappeared, and not only is there no stream, but the rounded arroyo sides are of smooth sand as though years had passed since water flowed between them. Many streams of abundant flow start out in this way, but all promptly disappear. And as the mountain acts as a barrier to check the rains that come in from the Pacific, the strip of land between San Pedro and the Gulf of California remains absolute desert.

On the western slope, however, the streams flow with greater assurance. One of them is turned from its channel and is carried along the skirt of the mountain for twenty miles to wash the gold from the soil of Socorro.

San Antonio creek is a fairly typical mountain stream, a rushing little river, flowing through its own dense growth of alders and alamos. It proves the mountain quality of its water, too, by sheltering speckled trout that reach the very respectable size of twelve inches.

In one fertile little cove in its deep, rocky canyon it nourishes an oasis of really tropical verdure, a tiny half-moon of land set thick with fig, grape and peach, where Jack Frost never intrudes.

Earns \$2 to Rescue Dog.

Peter Battinell, thirteen years old, of Stamford, Conn., owns a dog, of which he is very fond. Peter's parents neglected to license the animal, and it fell in the hands of the dog warden, who impounded it. When Peter learned that his dog was in pound he went to the dog warden and tearfully begged that the dog be not killed.

"I'll earn the money to pay for the license," he promised.

The dog warden told the boy to go ahead and earn the money, and a few days later he appeared with the \$2 and received a license. He took the dog away with him. He had earned the money by doing errands and mowing lawns.

The New Congressman.

"Well, how's being a congressman?"

"Not what it's cracked up to be. Been in congress nearly three months now, and ain't been able to get on no junket to the Panama canal."

BEGINNING WITH THE SHEEP

No Profit Can Reasonably Be Expected Until One Has Learned All the Little Details.

"The love of money is the root of all evil." It lures men into things that prove disastrous. The greater the profits, the more certain that a large number will fail in the undertaking. Why? Because when profits are large men are sure to rush in on a big scale, says a writer in an exchange. Two hundred per cent profit on one sheep is big. Then why not get 500 or 1,000 sheep and get rich quickly? That's the argument that traps everybody who has a get-rich-quick bee in his hat.

Remember this, that no man can succeed with sheep who has not first learned how. Big profits do not come

Yearling Full-Blood Karakul Ewe.

to greenhorns. There may be no profit at all for a year or so. Sheep are the most helpless of all domestic animals. They "don't know enough to come in out of the rain." They don't know much of anything. They have been cared for so attentively for centuries that they quit making any effort to care for themselves. The man who is not willing to give them this care is unfit to be a sheep man. It requires gentleness, for they are meek and helpless.

Our advice is to go slow with sheep. By all means, raise sheep. They should be on every farm. But start with a few, one or two dozen at most, and learn how to care for them. They will multiply as fast as your skill in sheep raising will warrant. If you can't save the lambs, then you are unfit for a larger number. If you can save them you soon have the large number. A dozen sheep will show you all the holes in the fences as completely as 500 will.

Prices are alluring, but keep a level head. There is no telling anyway, because they benefit the farm whether prices are up or down.

RATIONS FOR DAIRY CALVES

Little Bloodmeal Frequently Recommended as Preventive and Cure for Calf Scours.

That while linseed meal sometimes gives very excellent results, yet on the whole other preparations are to be preferred, says Hoard's Dairyman. Corn, barley, oats and bran are recommended for this purpose. With the young calf a mixture of low grade flour, sieved ground oats, cornmeal or linseed oil meal made into a jelly by boiling, continuing such feed for two or three weeks, while the stomach is small and incapable of utilizing coarser feeds, is suggested. As soon as possible, however, change to whole corn or whole oats with or without a little oil meal fed dry.

Among other mixtures proposed is one consisting of 20 pounds of cornmeal, 20 pounds of oatmeal, 20 pounds of oilmeal, 10 pounds of bloodmeal, 5 pounds of bonemeal. Change to corn, oats and bran when calves are three months old. A little of the bloodmeal as a part of the dairy ration is very frequently recommended. It seems to have in some way a tonic effect, and is also claimed to be both a preventive and a cure for calf scours.

POULTRY NOTES

Straw and hay make good nesting material. Keep your breeders healthy and doing well.

On the farm you should keep utility uppermost.

Shade for the chickens is very important in hot weather.

No one can foretell the sex of the chicks while still in the egg.

Keep the egg pan in the coolest place you can find about the farm.

May-hatched chicks, properly grown, make profitable fowls the coming winter.

Sickness and lice are scarce articles where poultry quarters are kept dry and clean.

Begin early to work up a trade in broilers. The market never will be overstocked.

The working hours of the poultryman extend from early till late; there are no holidays.

As a rule hens that lay steadily during cold weather are indifferent hot weather layers.

Little chicks need a feeding coop where they can eat in peace away from the older fowls.

Hardiness does not go by color of plumage. Hardiness depends upon the care given to fowls.

All eggs should be tested by the seventh day, which often makes it possible to reset some of the hens.

A quiet, gentle hen with the mother instinct strongly developed, is worth money in the chicken business.

If your flock is properly managed and cared for there will be little or no use of medicines and tonics.

So many set too many eggs under a hen. Few hens can cover more than 15, and then only in warm weather.

HERO ROLL IS LONG

Many Deeds of Self-Sacrifice Dot History's Pages.

Bravery of Northumberland Pitman's Daughter Deserves Place in Same Category as Grace Darling's—Rescue From Flames.

The heroic self-sacrifice of Captain Oates in the Antarctic has led to the detailing of many incidents of heroism, which go to show that the virtue is no more confined to class than to time.

Here, for instance, is the case of a pitman's daughter in Northumberland, which deserves to be placed in the same category with the brave act of Grace Darling.

It was Dora Chandler, a wisp of a girl of seventeen years, to whom the testing moment came, on a winter night within sight of the wild North sea. The wind howled round her wooden cottage at Blyth, but within a strange, heavy silence held the little rooms. Dora awoke shivering to a sense of ill-defined terror. She was not alone; five others—three women and two children—slept in the little place. Her father was at work in the pit. Suddenly her fears took shape.

It was smoke, heavy and stifling, which hushed the fury of the storm outside. Starting from her bed in her night-dress she raised a shrill alarm. The three women ran gasping and shivering into the open. The fire was blazing in the lower rooms, where that day the pitman had stored many pounds of blasting powder.

The girl joined her terrified friends, but the dull glare showed her that the children were missing. Despair and dread seized her heart; too well she knew there was no time to lose—perhaps no time to act—but her native courage rose undaunted. She sprang back across the threshold and groped blindly through the smoke, to reappear faint and choking with her seven-year-old brother in her arms. Her mother seized the boy, and Dora pushed back into the maelstrom of flame and smoke.

In silent terror the women waited till they saw her staggering out with her baby cousin safely unwrapped, her own scanty night attire torn and smouldering. Her precious burden safely delivered, she pressed yet again into the doomed cottage. This time, with still ed heart and trembling hands, she fought her way to safety laden with the blasting powder, and fell fainting into her mother's arms.

She had saved five lives, and by her undaunted courage prevented an appalling catastrophe.

At Christmastime a young soldier was passing with a friend an electro-plate's shop in Clerkenwell Close, London, Eng., when a dense cloud of suffocating smoke burst from the window overhead. At the same moment a boy threw up the lower sash and screamed for help.

The boy had been playing with his sister and upset two cans, one filled with cyanide of potassium, the other holding six gallons of vitriol. In a flash the small chamber reeked with a dense, black cloud of poisonous gas. The screams ceased abruptly, telling how the fumes were doing their work. For one instant the soldier blanched, then he turned quickly to his friend.

"I'm going through it, Jack, whether I come back or not; so 'goodby,' in case," he cried.

Words of a true gentleman, a nameless hero, who whilst he spoke seized his companion's muffler and adjusted it about his mouth. He disappeared inside, while the crowd waited in dazed suspense. Then one by one he recovered the unconscious children—an other boy of fourteen, a woman, and, lastly, her husband.

How he lived inside, where no other dared to venture, can be understood only by such as possess the same invincible courage. It was the spirit of sacrifice, quickened by undaunted pluck, which bore him through. His task concluded, he fell senseless to the ground with the man in his stiffened arms.

Let us not forget the never-to-be-forgotten heroic act of Father Canevin, a Roman Catholic priest, who died that an unknown messenger boy might live. In the city of Pittsburgh the boy lay disabled in the cellar of a skyscraper mown down by a cyclone. Father Canevin heard the sufferer's cries, and at once climbed down to him undeterred by the danger of a rocking wall which held all others at bay.

The good priest was in time to save the boy, but at the expense of his own life. He saw the wall cave, and deliberately arched himself over the lad that he might receive the falling mass upon his own back instead. The boy was dug out and lived; the heroic father was recovered—dead.

Wild Game in Kansas.

"The wildest land in Kansas is the land in these Arkansas river islands," remarked Senator Fred Dumont Smith after a week's trip up and down the river surveying the islands. "I have a whole family of wild deer on one of the islands near Ellinwood," said the senator. "There was a buck, a doe and a fawn. They were wild and disappeared as soon as they saw us. We found no end of coon and 'possum tracks, I saw where tons of wild grapes had gone to waste. Wild animals are abundant. The land of the island is rich and the soil is moist the year round. I saw enough young ash waist high to supply this town for 20 years with wood."—Topeka Capital.

NEW FIGHTING FORCE

FRENCH ARMY OFFICERS EXPERIMENTING WITH EAGLES.

Send Big Birds Against Aeroplanes Which They Fiercely Attack and Turn Upside Down—Must Seek Protection.

An interesting experiment, in view of the fact that the world's armies are now facing the problem of how to cope with the new force in warfare—the aeroplane, is being conducted by a number of French officers at Nice. The idea, it seems, was suggested by the fate of the famous aviator, Rogers, who met death because a seagull flew against him and disturbed his control of his machine. The officers argued amongst themselves that if a modest-sized bird such as the seagull could wreck an aviator, the powerful eagle could surely become a terrific fighting and wrecking force in the air. So, as Nice is but a few miles from the Alpine home of the Swiss eagle, six birds were immediately put into training.

Machines resembling aeroplanes in shape, but supported by balloons, to which were attached pieces of meat, were sent up, and the eagles let loose. With fierce cries and flapping of their wings they attacked the aeroplanes and tore the meat from them. In their eagerness they fight one another, and the aeroplane is sometimes turned upside down in their struggles. It is inconceivable that any men in an aeroplane, even if there were three or four of them, could retain control of their machine in face of such an attack. One after another the eagles attack all the aeroplane balloons until they are wrecked, and their trainers feel certain that they will now attack real aeroplanes with men in them with the same ferocity.

How will the birdmen parry these attacks? Suppose they carry revolvers or short repeating rifles; to shoot a bird in the air is notoriously difficult, but to shoot half-a-dozen swooping and clawing at you all at once, seated in a trembling aeroplane, would be well-nigh an impossibility. The suggestion is made that fighting machines shall have round them electric wires that will give the eagles a powerful shock as they touch them. To do this it will be necessary to carry a dry battery, and this will add to the weight of the machine. The wires, moreover, will increase the danger and difficulty of guiding the aeroplane. The aviator is likely to touch one of the wires and lose control of his car, with fatal result. But the birdmen will certainly have to find ways of protecting themselves against the war-eagles. We may well ask: "What next?"

Noise Killing Mankind.
Man's nerves and hearing apparatus were evolved in comparatively quiet surroundings, to detect faint sounds warning him of danger or of the presence of game. Sudden loud sounds shock the system greatly—in childhood they may cause convulsions.

In time we might evolve a race immune to noise, but it can only be done by killing off those who are most injured by it, and these nervous people are often the very ones who are doing the most to advance civilization. So the only thing to do is to make the environment fit for them and not kill them as unfit for the environment. The first step is to abolish unnecessary bells, whistles and street cries, construct less noisy pavements and give children playgrounds where they can blow off steam to their dear hearts' content and not annoy anyone, not even long-suffering, head-achy mamma.

A genius who can still the noise of our dreadful streets and tube railways will be dubbed "blessed" by the world.

Cleaning An Ocean Liner.
Not many people are aware that during the few hours a great ocean liner remains in dock she is cleaned thoroughly inside and out. The hull is repainted, the funnels scraped and cleaned, and every piece of exposed metal polished.

Meanwhile, all carpets are taken up and beaten, the floors scrubbed and repainted, and tables repolished, chairs regilded and stained, in every part of the ship. On the great boats there are more than 30,000 pieces of linen to be counted, sorted, prepared, and laundered. Then there are 15,000 pieces of silverware, 25,000 pieces of glassware, some 60,000 dishes, plates, cups, saucers, etc. As soon as a piece shows signs of wear it is discarded and replaced, and all this work has to be done in a few hours.

Master and Bosses.
"Why do you give so much attention to pictures?" "Well," replied Mr. Cassius Chee, "in accumulating my fortune I have come more or less into contact with legislation. I like to spend some time among the old masters in art to get my mind off the fresh bosses in politics."

How He Settles.
"I understand your husband is a man of great abilities." "He certainly is. He beat up four bill collectors yesterday so they can't come back for six months."—Flegende Blatter.

Why Not?
Knicker—"Think the stock exchange should be regulated?" Boomer—"Yes, it should be arranged for stocks to go up when you buy and go down when you sell."

CEREMONIES At HINDU WEDDING

FEW foreigners in India have the privilege of witnessing a high caste Hindu wedding and only special circumstances enabled the writer to be present at the ceremonies described here.

Subhodra, the barber, had arranged a marriage between Anandi, only daughter of Dhola Buksh, a wealthy member of the Kahatriya caste, and Surindro Tagore of the same caste. That is one function of barbers in India. Anandi was not quite ten. Surindro was just eighteen. Anandi had never seen her future husband. Nobody had ever thought of asking the opinion of either of the most interested parties as to the proposed marriage.

The expenses of a Hindu wedding comes upon the bride's father, and they are so great that a family sometimes is ruined or impoverished for many years by the marriage of a daughter. The next most costly affair is the burial services. Should the head of the family escape bankruptcy when his daughter is married, the eldest son is almost sure to be ruined when he buries his father. The woman barber, who is another great institution in India, came every day. For two weeks she bathed Anandi frequently in perfumed water. Every day the girl's hands and feet got an application of henna. On the evening of the wedding day Anandi was bathed in rose water and her hands and feet got a last application of henna.

Many Jewels.
She was dressed in a red silk sarree embroidered with gold and finished with a golden border at the bottom. Around her waist were wound chains of gold, which were fastened by gorgeous buckles set with jewels. Her arms from the shoulder to the wrist were covered with armlets and

INDIAN PRINCE, HIS TEN WIVES AND FOUR CHILDREN

bracelets. Close under her throat was a necklace of pearls, below which hung a dozen or more gold chains. Her ears, which had been pierced in six places, had earrings of fine workmanship suspended from each hole. From where the hair met the forehead was hung a fringe of gold and pearls. On her ankles were gold bangles. All of this gold would have proved a heavy burden to the bride if she had been obliged to walk, but she was not.

In another part of the house the gurus of the two families were laying down the law to the two fathers-in-law, making the necessary settlements and promises. This ceremony, which is tedious and lasted several hours, was enlivened by the babus who went among guests and sprinkled them with rose water which was carried in silver vases.

On upon the ears of the guests burst the cry "The bridegroom comes!" All heads were turned to see six little girls who could not have been over six years of age bearing lighted torches run through the court and out into the street and lead Surindro in.

The bridegroom was seated upon a rug placed in the center of the court for him. While he was seated on this rug, and it was as much as an hour, he was instructed in his marital rights and duties by the family guru.

On the ground, nearly in front of Surindro, was a small pan of bright red coals of sacred fire; and at his side was the barber, who was master of ceremonies and who from time to time blew a trumpet.

The family guru left the courtyard and went into the women's apart-

TO KEEP YOUTH and beauty—to prevent wrinkles and "crow's feet" and deep black circles under the eyes—nothing is as good as Dr. Pierce's FAVORITE PRESCRIPTION

Give it a fair trial for banishing those distressing pains or drains on one's vitality. This prescription of Dr. Pierce's regulates all the womanly functions. It eradicates and destroys "Female Complaints" and weaknesses that make women miserable and old before their time. Every girl needs it before womanhood. Every mother needs it. It is an invigorating tonic for the female system. All medicine dealers have sold it with satisfaction, to customers for the past 40 years. It is now obtainable in liquid or tablet form at drug stores—or send 50 one-cent stamps for trial box, to R. V. Pierce, Buffalo.

DR. PIERCE'S PLEASANT PELLETS
regulate and invigorate stomach, liver and bowels. Sugar coated, tiny granules, easy to take as candy.

Few Keep Perfect Time.

One very peculiar idea which prevails about a watch or clock is that when it is being regulated and the hands are moved forward or back to set it, if a little too much is gained the timepiece will continue to gain or lose, whichever the case may be. Simply moving past a certain hour often seems to start the timepiece to running either faster or slower, as the case may be. But few clocks keep perfect time. Atmospheric and magnetic conditions seem to interfere in most instances.

For the Congregation.

One Sunday a diminutive preacher exchanged pulpits with a pastor who was a giant in stature. The pulpit was unusually high and was reached by a winding stairway. He ascended very slowly and for some time disappeared from sight. At length the congregation saw a little bald head raised above the pulpit, so that only the eyes were visible, while the preacher announced his text in a high squeaking voice: "It is I; be not afraid."

Parliamentary.

It was getting late, and still the venerable ex-United States senator lingered in the parlor with the young people. Evidently something had to be done. "I hope, papa," said his daughter, gently but resolutely, "that you will not be offended if I now move a close call of the house, during which all persons not entitled to a voice in the proceedings will please retire, while Charlie and I discuss a question of personal privilege!"

Apparently a New Monarch.

"His Majesty, King of Australia, Sydney, Australia," was the address of a letter sent by a school girl in Barbados asking "his majesty" to give a present to her teachers. The letter when it arrived at Sydney, was referred to the New South Wales chief secretary "for official decision."

Can't Take the Picture Seriously.

The picture of a man holding a large fish does not necessarily prove that he is telling the truth. Photographers nowadays are too expert in grafting the picture of a fish taken at close range onto the end of a line held by a man whose picture was taken at a considerable distance.

Naming the Baby.

"Have you decided on a name for the baby yet?" "Not as yet. My family has named one member of a commission and my wife's family has named another. These two are to agree on a third, and the three of them are to decide on a name."

FARMER'S WIFE ALMOST A WRECK

Restored to Health by Lydia E. Pinkham's Vegetable Compound—Her Own Story.

Westwood, Md.—"I am a farmer's wife and do most of my own work when I am able. I had nervous spells, female weakness and terrible bearing down pains every month. I also suffered much with my right side. The pain started in my back and extended around my right side, and the doctor told me it was organic inflammation. I was sick every three weeks and had to stay in bed from two to four days."

"It is with great pleasure I tell you what Lydia E. Pinkham's Vegetable Compound has done for me. I have followed your directions as near as possible, and feel much better than I have felt for years. When I wrote you before I was almost a wreck. You can publish this letter if you like. It may help to strengthen the faith of some poor suffering woman."—Mrs. JOHN F. RICHARDS, Westwood, Maryland.

Women who suffer from those distressing ills peculiar to their sex should not doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Before Fame Came.
A widely admired campaign speaker in Nebraska, who had been billed to make the principal address at a political meeting in Lincoln, was obliged at the last moment to cancel his appointment.

William Jennings Bryan was chosen to fill the vacant place. Mr. Bryan, however, knowing that he was to act as substitute for an older and more popular man, was rather nervous. His apprehension was increased when the chairman announced him in the following manner:

"Feller citizens: This here's the substitute for our gallant an' admired leader, unfortunately taken sick. I don't know what this gent can do; but time was short an' we had to take what we could git."

Wan, Weary and Worn Out

If You Feel Fagged to a Finish and Utterly Used Up Here is Quick Relief.

Half the people you meet complain of weary muscles, stagnant brain, jangled nerves, and a mournful desire to lay down and just quit. Most of these people have been using nervines that spasmodically flare up the nerves only to die down again, as die they must. Avoid nerve stimulants. Bear in mind that this worn out feeling is due to poor blood, to bacteria in the water you drink; to the multiplying of destructive germs in the blood faster than they can be overcome by the white corpuscles; and to what is known as auto-toxemia, that condition where the venous or impure blood accumulates faster than it can be replaced by the red arterial blood.

One ingredient in S. S. S. serves the purpose of stimulating the cellular tissues to select from the blood the nutriment that renews its health and energy. If you feel played out go to any drug store and ask for a bottle of S. S. S., Swift's Sure Specific. Insist upon having it and do not be persuaded to take something else claimed to be "just as good." S. S. S. is a remedy that gets at work in a twinkling; it just naturally rushes right into your blood, scatters germs right and left, up and down and sideways.

You feel better at once, not from a stimulant, not from the action of drugs, but from the rational effect of a natural medicine just as active and just as timely as to a man who has been lost in the mountains, is about starved and comes across a settler just cooking a savory meal of good honest beef. Do not neglect to get a bottle of S. S. S. to-day. It will make you feel better in just a few minutes. It is prepared only in the laboratory of The Swift Specific Co., 160 Swift Bldg., Atlanta, Ga. Send for the free book telling of the many strange conditions that afflict the human family by reason of impoverished blood.

Poor Girl.

"May I tell you the old, old story?" he asked. She looked down, blushed and nodded her assent. So he told her for the twenty-seventh time how he once won the game for Yale.—Brooklyn Life.

Constipation causes and aggravates many serious diseases. It is thoroughly cured by Dr. Pierce's Pleasant Pellets. The favorite family laxative.—Adv.

Economy.

Hub—"Have you done what I asked and saved some money this month?" Wife—Yes, dear. I spoke to the grocer and he's promised not to send in his bill till next month.

Diogenes' Reply.

Diogenes, when someone had said to him, "You pretend to be a philosopher, but know nothing," rejoined: "Even pretending to be learned shows a fondness for it."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period. Adv.

Trees "Shot to Death."

For literally shooting trees to death a pistol has been invented in England that fires into their limbs steel bolts that tear out the living cores.

Bent on Getting Money.

"What excuse did the arrested cashier give for being crooked?" "He claimed he was in straitened circumstances."

WORMS

cause much annoyance to children and great anxiety to parents. The presence of worms is recognized by these common symptoms: itching nose, unsatisfied appetite, offensive breath and colic pains.

DR. PEERY'S VERMIFUGE "DEAD SHOT"
Cleanses the system of worms in a very few hours

NOTICE OF MEETING OF STOCK- HOLDERS

Office of Campbell Water Company, Campbell, Cal., June 20, 1913.
In accordance with a resolution adopted at the regular meeting of the Board of Directors of the Campbell Water Company, held on the 7th day of June, 1913, a special meeting of the stockholders of said corporation was called to be held at the office of said corporation at the principal place of business thereof, at the building where the Board of Directors usually meet, to wit: the building of the Campbell Realty Company at the Northeast corner of Campbell Avenue and Central Avenue, in the Town of Campbell, County of Santa Clara, State of California, on Tuesday, the 26th day of August, 1913, at the hour of 9 o'clock A. M.
The object of said meeting is to take into consideration and decide upon the proposition to increase the capital stock of said corporation from Seventy-five Hundred (\$75,000.00) Dollars divided into Three Hundred (300) shares of the par value of Twenty-five (\$25.00) Dollars each, to Twenty-five Thousand (\$25,000.00) Dollars divided into One Thousand shares of the par value of Twenty-five (\$25.00) Dollars each.
S. G. RODECK,
President of the CAMPBELL WATER COMPANY.
JOHN F. DUNCAN,
Secretary of the CAMPBELL WATER COMPANY.

NOW watch out for new legislation in Illinois for the next few sessions of that legislature. By the new law just signed by Gov. Dunne, the ladies are given the ballot in that state. Now the state will enjoy a long dry spell in spots.

WE should Worry! Reports of the prize fights held at San Francisco July 4th show to what extremes some men and women will go to have what they enjoy as "sport." It is a misnomer when called a sport, for such matches are nothing more nor less than a brutal exhibit of a brutish nature. For some time after the knock-out blow in the fight at Los Angeles, the life of the victim hung in the balance. The law now governing fights is not what it should be and "progressive California" is far behind many of her sister states in that particular. A strong fight was made in the last legislature for a better law which failed to pass owing to lack of concerted action. That is the next "progressive law" the women of the state will get behind.

JUST what the end is to be regarding the reckless driving of automobilists on the mountain roads, is hard to say, but the result is the inevitable death. Men drive at the rate of thirty miles an hour around the steepest mountain grade regardless of the fact that below lies a precipice of hundreds of feet. For fear that they might not demonstrate fully the fact that their car can make the steepest grade on the highest gear at a breakneck speed, they fling defiance in the face of death, not for a moment considering that human life must pay the penalty. It seems that the government must take the matter in hand, pass a law that regulates the rate of travel of these speed-maniacs, and then, if necessary, incur the expense to place patrolmen upon these dangerous grades, to see that the law is rigidly obeyed to the letter, placing a tax upon the automobile owners. Drastic measures seem the only cure for these fool-hardy drivers. Santa Clara Journal.

Local and Personal

The J. C. Ainsley family have been enjoying an outing at Mt. Hermon.

Warren Shelley visited his wife at Santa Cruz the fore-part of the week.

Horse For Sale: Inquire of A. E. Sargent, Hamilton Avenue, Campbell.
Herbert and Carl Scholz, Wm. Ross, Floyd Bohnett and Claude Townsend all enjoyed the sea breezes at Capitola the week-end.

Mr. and Mrs. C. E. Hanger and Olive Randall returned yesterday from their annual outing at Seabright. Mr. Hanger is looking after what few cots he has.

The Geo. E. Hyde Co. began canning apricots in their new building yesterday. At present but one patent sealing machine is being used. This is the first season of packing green fruit and enough will be canned for a few special orders. For a number of years parties have urged Mr. Hyde to pack for them and thru the jobbers he has been dealing with a good business is promised him in this line in the future. Mrs. H. S. Inman is forelady of the new department.

The cottage on south Central Avenue belonging to Attorney H. A. Harding of Los Gatos was badly burned inside last evening although the outside was not much damaged. The chemical brigade did such effective work until the water was turned on that the fire was soon under control. This is the third fire on this property within a very short time but before the fire was put out by one man. The exact origin is not known and many conflicting stories are current. The furniture in the house belonged to Marion Couch. It has not been learned whether any of the property was insured.

That Chemical Engine Account

A few years ago at the solicitation and promised backing of a number of citizens, S. R. Wade bought and paid for the large chemical engine that has done such efficient service at the recent fires. The cost of engine hose and extras was \$248.25. Since that time for subscription Mr. Wade has been paid \$141 leaving a balance of \$107.25 due Mr. Wade. In justice it is up to the good citizens of the town to reimburse him for the original cost and the cost of the numerous recharges that are not included in the \$248.25. Those who have subscribed are as follows:

J. F. Glover Buys Store

Mr. F. R. Glover who came here from Redlands, Cal., Monday evening, has purchased the stock and retail business of C. H. Tracy formerly known as the Mrs. Brundage store.

Mr. Glover owns an orange grove at Redlands but owing to the frost has no crop this year, and the ranch will be cared for by one of his sons. He will return to Redlands next week to straighten his affairs and make preparations for moving here as will also one of the younger families.

Mr. Glover will make some changes in the store for the convenience of the trade and solicits the patronage of the community.

To Readers of Campbell Press.

It gives me great pleasure to tell you in a few words; about the great Epworth League Convention held at Mt. Hermon this year June 23-30.

We left Campbell June 23-10:30 P. M. and shortly after arriving at one of the most beautiful spots to be found between here and Santa Cruz, we unpacked our trunk of eatables and furnishings and arranged our room for a week's outing.

Already one hundred delegates had registered and the crowd of happy Leaguers hiked to the Big Trees for the afternoon. On returning all were glad to surround the tables and enjoy the first supper at this season's outing. At 7 o'clock all met in a large tent called the tabernacle and played games, sang songs and marched around the building in a way that enabled every one present to shake hands with everybody. At 8 o'clock all was quiet and each member of the faculty gave his initiatory speech.

The meetings all through were great and I cannot take time to tell of them all. On Tuesday afternoon the crowd went on another tramp among the beautiful hills which are cut up by trails, over and under huge fallen trees, over creeks, through shade and sun, seeing birds, and fish, and really enjoying some of God's most beautiful scenery.

Wednesday P. M. the Leaguers played ball. You need not ask whether they know how or not and don't ask the score. The competitors were Preachers and Laymen.

Thursday P. M. the Ladies of the institute played base ball. This game was very interesting, the field was not one of the best but all players seemed to have learned all the bumps and hollows so that the ball was kept well under control. Did you ever witness a girl's base ball game? I think the Mt. Hermon girls play just a little better than any I ever saw. The address given by Dr. White of Oakland, on the theme of amusements was a very touching and instructive one. One of the greatest faults of the church today is that so many of the young people spend too much time in the theater, ball room, and at games of cards. These things demoralize and degrade the human race faster than anything else. After this address by Dr. White a young man arose and confessed that he was a professional gambler and did enjoy the business but if Dr. White had told the truth, he said he had played his last game, and saw where he had made a sad mistake in this way of living.

In a later meeting this young man gave himself wholly up to give his full time for service for the cause of Jesus Christ. Friday nearly all paid twenty-five cents for a return ticket and spent the P. M. at Santa Cruz, swimming, fishing, boating, shooting, sight seeing and what not. Lunch was eaten while they sat on the clear sand at the beach.

Next in order were the track games. We had foot races by Ladies, Preachers, boys, and men, sack races, suitcase race by the ladies three legged race, (in which the writer and his mate came out 3d.) hurdles. Besides many other sports were the tennis games. Prizes were given all the winners of contests.

All told there were over three hundred delegates present. All the forenoons were taken by the classes starting at 6:30 when about 200 attended the morning watch, and closing at 12:30; a social evening to each day from 7 to 8, followed by a lecture, one given by our Bishop E. H. HUGHES, and Saturday evening the crowd went to a well known camp spot and enjoyed a pleasant program while the huge camp fire gave ample lighting for the evening.

Sunday was the big day, in the P. M. a meeting for Leaguers only was held in which 28 young people gave their life's service for the Ministry, Missionary work, Deaconess work, and Y. M. C. A. work.

I have many interesting pictures of most all the important events and would be glad to tell any one more about this great institute and show the pictures.

J. C. GORDON.

BILLY HOBSON'S Remodelling Sale Is Now On

Three good reasons for this sale

1. I'm going to remodel the interior of my store and I've got to dispose of a big part of my stock at once.
2. This has been a backward season and I have about 400 suits too many.
3. This is Clearance Sale time, anyway, and my summer stock has got to go.

You'll save a pile of money if you come while this sale is under way
